1. DETERMINE MOUNTING ORIENTATION

Determine which direction the mounting head should tilt, as well as top or bottom cable routing location.

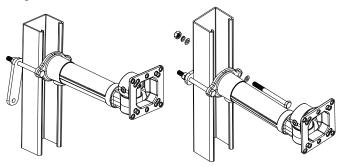

2. ATTACH TO STRUCTURE

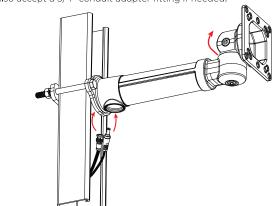

Attach the back plate to the mount using one 2-1/2" bolt, two flat washers, one lock washer, and one nut.

Place the bracket onto your mounting structure, and rotate the mounting plate into position. Attach the remaining bolt, washers, lock washer, and nut and tighten onto the structure.

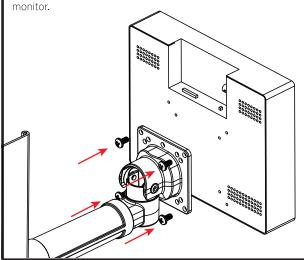

3. ROUTE CABLES

Cables can be routed through the backside of the bracket, or through the cable access hole in the bracket's arm. The hole in the bracket's arm can also accept a 3/4" conduit adapter fitting if needed.

4. ATTACH MONITOR

Attach the monitor to the bracket using appropriate sized screws for your

5. ADJUST ANGLE

Using the included 5mm Allen wrench, loosen the three Allen head bolts to adjust the tilt, and angle of the mounting head.
